

PRANAY PRADIP GURAV

Software Engineer | Full-Stack Developer

9321596204 • guravpranay81@gmail.com • Kalyan, Maharashtra • [Linkedin](#) • [PortFolio](#) • [Github](#)

SUMMARY

Software Engineer and Full-Stack Developer with experience building 3+ production-ready web applications from concept to deployment. Skilled in developing RESTful APIs, implementing secure authentication and authorization systems, and designing scalable database architectures using React.js, Node.js, Express.js, and MongoDB. Strong foundation in end-to-end application development, performance optimization, and delivering responsive, user-centric web solutions.

SKILLS

Frontend: React.js, Next.js, JavaScript,HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Core Competencies: RESTful APIs, Authentication & Authorization, Client-Server Architecture

Development Tools: Git, GitHub, Postman, Docker

WORK EXPERIENCE

Eargs Learning Solutions Pvt Ltd

Dec 2025 – Feb 2026

Web Developer Intern

- Developed and maintained multiple **frontend components**, enabling seamless communication between **client-side interfaces** and **backend services**.
- Integrated and utilized **API endpoints** for dynamic data rendering, enhancing **application functionality** and **user experience**.
- Worked with the development team to identify, debug, and resolve **frontend-backend integration issues**.

PROJECTS

FixMyArea – Local Issue Reporting System, Live Project

[Link](#)

Jul 2025 – Oct 2025

Technologies: MongoDB, React, Node.js, Express.js

- Built a full-stack **civic issue reporting platform** that streamlined the process of reporting and tracking local community issues.
- Implemented **JWT-based authentication** and **role-based access control** to ensure secure access for citizens, authorities, and administrators.
- Developed **10+ REST API endpoints** for authentication, issue reporting, comments, and status tracking
- Integrated **frontend and backend systems** to provide real-time issue tracking and a responsive user experience.

AgroInsight – Agricultural Intelligence Platform, Live Project

[Link](#)

Nov 2025 – Dec 2025

Technologies: MongoDB, React, Node.js, Express.js

- Built a full-stack **agricultural intelligence platform** by integrating multiple external **APIs** for **weather** and **crop market data**.
- Developed **backend services** to aggregate, process, and deliver **real-time agricultural data** to **frontend dashboards**.
- Integrated **3+ external APIs** for weather and crop market data.
- Designed **interactive data visualizations** to assist users in monitoring **weather conditions** and **crop price trends** efficiently.

ApIyO – Job Application Tracker, Live Project

[Link](#)

Jan 2026 – Feb 2026

Technologies: HTML5,CSS3,Javascript,LocalStorage

- Developed a **job application tracking platform** with a structured **CRUD-based workflow** for managing application records.
- Implemented **data persistence** using LocalStorage to simulate backend functionality and maintain user data across sessions.
- Created and designed **responsive user interfaces** for creating, updating, tracking, and organizing job applications.
